

BUSSELTON WATER STORYBOARD COMPETITION

This year we're inviting students to use their creative imagination and design a six-box storyboard based on our story synopsis for a chance to win some great prizes!

Winning entries will be decided by public vote from a shortlist of entries on Facebook. Prizes for the first, second and third places in each category (years PP-3, 4-6, 7-9, 10-12) will be announced on Friday 20 October 2023.

Participating schools will also receive a \$200 voucher to Jacksons Drawing Supplies.

To enter, submit your completed story board to us by Thursday 12 October. Completed storyboards can be submitted via email to nww@busseltonwater.wa.gov.au, through your school or delivered to the Busselton Water Administration Centre.

If storyboards are entered by a parent, carer, or guardian, they must include details of the school attended by the student.

The storyboard template and competition T&C's are available on our website - [here](#)

STORYBOARD SYNOPSIS:

Water can be found almost everywhere at any given time. As it changes forms, it travels throughout the world by the water cycle, which is nature's way of recycling water. If you were to travel with a water molecule, you would explore ocean depths, float through the atmosphere, splash down on a mountain, and weave among soil particles deep underground.

Imagine you are a water drop traveling through the water cycle. What would you see? Where would you go? Who would you meet along the way? How is your adventure *United by Water*?
